Hang on to your hats, here comes
ARTIFICIAL INTELLIQUEST!

OUR STORY SO FAR...

Everywhere you turn these days, people are looking at AI. How to use it, how to fool it, how to avoid it like the plague. We're no different, so since we were running out of time this year, we gave AI a try* to see if it could be helpful as we worked to make a puzzle quest that you would enjoy.

In a twist that nobody could possibly see coming, what we ended up with wasn't exactly what we wanted. And the more we tried to fix things, the worse it got - it took us twice as long to fix the AI generated mistakes! At this point, we are a little afraid of feeding it any more information. That's where YOU come in - hopefully you and your human smarts can help us see our way through the mess we got ourselves into.

HOW TO PLAY

Artificial IntelliQuest is a Puzzle Hunt containing nine puzzles, plus a metapuzzle. Two puzzles will be released on the evening of the first four nights of the cruise, with a final puzzle and a meta-puzzle released on the fifth night.

We recommend solving the puzzles solo or in groups of two, depending on your level of experience. The answer to each puzzle is a word or short phrase. The daily answers will be used as part of the meta puzzle.

The internet should not be required, but nobody knows everything, so the back of this sheet has some useful information you might have found on Wikipedia.

Feel free to ask one of us for hints. You can also find hints and answer checks by going to "Onboard Activities" in the web version of Twitarr, or the "Entertainment" menu in the Tricordarr app, and looking for "Puzzle Hunts". (Type 'HINT' in an answer box to see a puzzle's first hint; some hints contain keywords for additional hints.)

DISCLAIMERS

*No AI was used in the making of these puzzles. Any resemblance to AI generated puzzles is purely coincidental.

Any use of these puzzles to "train" generative artificial intelligence (AI) technologies is expressly prohibited.

Letter	Index	Binary	Braille	Sema-phore	Morse	Pigpen
